

# ROUGH ROCK

## WHAT?

**AUTENTICO ROUGH ROCK** is a part of the **CREATIVE POWDER** range and it consists of a powder that -when mixed with any colour of Autentico Vintage-creates stunning faux stone finishes.

## WHERE?

**ROUGH ROCK** can be used indoors on walls or on furniture, lamp bases and such items.

## HOW?

Paint surface with Autentico Vintage. This can be the same colour as your upcoming mixture, an adjacent colour or a colour opposite to the mixture depending on desired look. Let dry.

Mix 1 part **ROUGH ROCK** to 1 part of Autentico Vintage. You can add water if the mixture is too thick. Paint mixture on surface and let dry. Sand down high peaks if needed. Let dry for 24 hours. The result will be a truly unique stone finish.

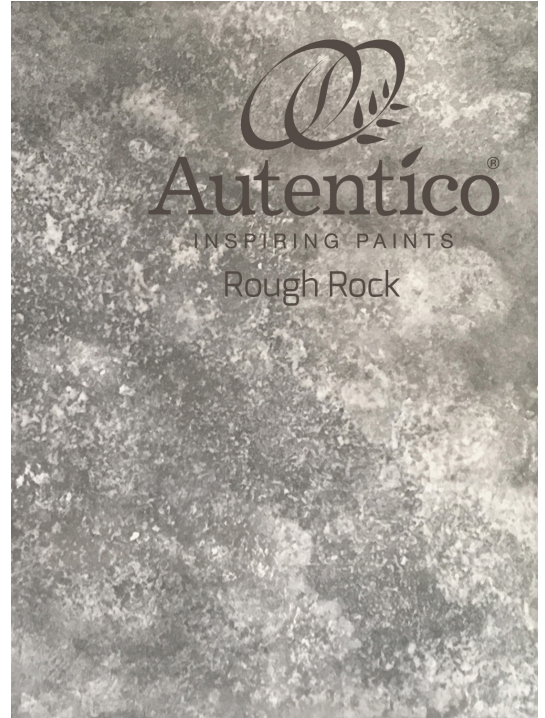

Use your imagination to create cool patches of different colours.

**ROUGH ROCK** is great to use to create a textured stone finish prior to application of other techniques.
